

## IN-LINE Centrifugal Pumps

---

Made in Turkey

Catalogue 50 Hz

## TB Series

### In-Line Centrifugal Pumps

#### General Information

#### Fields of Application

The SISTEMA in-line pumps are designed for,

- Water supply,
- Boosting,
- Circulating of hot and cold water,
- In central heating and air-conditioning installations,
- Liquid transfer applications in industry, agriculture, etc.

#### Pumped Liquids

Thin, clean, non-aggressive and non-explosive liquids free from large solid particles or fibres.

Cooling liquids, not containing mineral oil. (Oil-resistant O-rings are available on request.)

For special applications, please consult to SISTEMA

#### Design

- The TB pumps are single-stage centrifugal pumps of non-self-priming type fitted with standard motors and mechanical shaft seals.
- The nominal flow rates of the pumps comply with the DIN 24 255 standards.
- Pump flanges sizes according to EN 1092, PN 16. The dimensions of the suction and discharge ports are identical. Both pump flanges have pressure gage tapings.
- Single entry, closed impeller is hydraulically thrust compensated and dynamically balanced.
- A drain plug is fitted in the bottom of pump housing.
- The motor shaft is passed into the pump shaft for coupling and no need to use any coupling for the system.

#### Shaft

Chromium steel (AISI 420) fine grained shafts are used on TB pumps. Motor shaft is passed into the pump shaft for coupling. For high powers, a coupling system is used between the motor shaft and pump shaft.

#### Bearings

For TB series pumps, the motor shaft and pump shaft are passed into each other. The axial and the radial loads are carried by the bearing inside the motor. There is no need to use extra bearing for the pump. For high powers, a coupling system is used between the motor shaft and pump shaft.

#### Shaft Seal

- TB pumps are fitted with a single, uncooled and unbalanced rubber bellows mechanical seal.
- Mechanical seal flushed from internal source.
- The circulation of liquid in the duct of the air vent screw ensures lubrication and cooling of the shaft seal.

For a medium different than water, please consult to SISTEMA for selection of appropriate O-Ring and Mechanical Seal type.

#### Technical Data

- Suction Flange : DN 40 - DN 250
- Discharge Flange : DN 40 - DN 250
- Operating Pressure : 10 Bar
- Test Pressure : 13 Bar
- Operating Temperature : -25 – 120°C
- Capacity Range : 2 – 700 m<sup>3</sup> / h
- Head Range : 2 - 70 m
- Speed: : 900-3600 RPM

Inform us in your orders, for suction pressure above 7 Bar.

#### Driver

B5, B14 flanged, IP 55 and according to IEC electric motors are used for TB series pumps. 50 Hz and 60 Hz can be used.

#### Identification Code

# TB Series

In-Line Centrifugal Pumps

## Sectional Drawing and Part List (Without Coupling)

Part No	Part Name	Part No	Part Name
01	Pump Casing	261	Pipe Plug, Pressure Gauge

**Mounting Arrangement**

TB Pumps can be installed with the motor (Motor Centre Line) in all positions between vertical and horizontal. To avoid that the water penetrates motor and bearings, the motor (terminal box) must never fall below the horizontal.

**Permissible Forces and Moments at the Pump Flanges**

The following condition must be satisfied;

$$\left[ \frac{\sum(F_V)}{F_{V\max}} \right]^2 + \left[ \frac{\sum(F_H)}{F_{H\max}} \right]^2 + \left[ \frac{\sum(M_t)}{M_{t\max}} \right]^2 \leq 1$$

$\sum(F_V)$ ,  $\sum(F_H)$  and  $\sum(M_t)$  are the sums of the absolute amounts of the corresponding loads applied to the supports.  
Neither the direction of the loads nor their distributions across the supports are taken into account in these sums.

## TB Series

In-Line Centrifugal Pumps

### General Information About Minimum Efficiency Index Implementing

---

Product Information as per Regulation No. 547/2012 (for Water Pumps with a Maximum Shaft Power of 150 kW) Implementing "Ecodesign" Directive 2009/125/EC

Minimum Efficiency Index for SISTEMA TB Pump Series is shown on the pump label.

MEI values of SISTEMA TB Pump Series are shown on the pump characteristic curves.

Minimum Efficiency Index for SISTEMA TB Pump Series; Minimum 0.4. (MEI $\geq$ 0,4)

Efficiency values of the pump characteristic curves, which are cut diameter, are expressed in %.

TB Series water pumps, the pump efficiency can be achieved more than fix speed in case of variable speed control.

More information about the Ecodesign can be reached at [www.europump.org](http://www.europump.org)

**TB Series**

**In-Line Centrifugal Pumps**  
**Performance Curves**

**TB 125-315**

The Performance Curves 50 Hz are based on the kinematic viscosity 1 mm<sup>2</sup>/s and density 1g/cm<sup>3</sup>. Tolerances are acc. to ISO 9906 Annex A.
